EDUCATION

Vellore Institute of Technology

B.Tech in Computer Science and Engineering with specialization in AIML

Nov 2023 – Present

CGPA: 8.20

The Tribhuvan School

Higher Secondary Certificate – 81%

Patna

June 2023

The Tribhuvan School

Secondary School Certificate – 85%

Patna

June 2021

TECHNICAL SKILLS

Programming Languages: C++, Python

Machine Learning & Data Science: Scikit-learn, TensorFlow, Matplotlib, Seaborn, Natural Language Processing, NumPy, Pandas, Power BI

Web Frameworks & Deployment: Flask, Django, Streamlit Community Cloud, Render

Databases & Tools: MySQL, Git, GitHub, MongoDB, AWS(S3, EC2)

PROJECTS

Tesla Stock Price Forecasting | Python, TensorFlow, Keras, Streamlit, scikit-learn, Pandas

March 2026 – April 2026

- Developed LSTM and SimpleRNN deep learning models to forecast Tesla (TSLA) adjusted-close stock prices using 60-day sliding window sequences for time-series prediction.
- Engineered a comprehensive preprocessing pipeline including MinMaxScaler normalization, lag-based feature engineering, and train-test split validation for robust model training.
- Achieved 94% R² score with SimpleRNN, outperforming LSTM's 91% in this specific configuration, with RMSE of 2.45 and MAE of 1.87 on test data across 5,000+ trading day sequences.
- Deployed an end-to-end interactive web application using Streamlit, featuring dynamic Plotly/Matplotlib visualizations and real-time prediction capability with sub-second inference latency.

Shopper Spectrum | Python, Pandas, NumPy, Scikit-learn, Streamlit, Plotly

May 2026 – June 2026

- Developed an end-to-end customer intelligence platform using unsupervised machine learning to segment e-commerce customers and deliver personalized product recommendations.
- Engineered RFM (Recency, Frequency, Monetary) analysis pipeline with K-Means clustering, successfully identifying 4 distinct customer segments: High-Value, Regular, Occasional, and At-Risk shoppers.
- Implemented Item-based Collaborative Filtering for product recommendations, achieving 90%+ similarity accuracy across 5,000+ unique products and 500,000+ transaction records.
- Deployed an interactive Streamlit dashboard featuring real-time customer segmentation predictions, product recommendation search, and visual analytics for business stakeholders.

June 2025

Google IT Support

Google

Feb 2026

ACHIEVEMENTS

- Technical Competitions: Active competitive programmer (LeetCode 1423, Codeforces 924) and national-level hackathon participant, advancing to Round 2 of the Adobe India Hackathon and ranking in the top 5% at HackVega.
- Co-authored "AGRI-PREDICT: AI-Driven Framework for Crop Price Forecasting using ML & Time-Series Analysis" published in IJIRT. | Research Paper Link |
- ServiceNow Virtual Internship (SmartBridge + AICTE) | May 2026 - Completed 8+ modules including ServiceNow Administration, Agentic AI, Automated Test Framework (ATF), Reports, and CSA Exam Prep. | Certificate of Completion |
